1 Hardware: Hardware-accelerated parallel non-photorealistic 77%

volume rendering

Eric B. Lum , Kwan-Liu Ma

Proceedings of the second international symposium on
Non-photorealistic animation and rendering June 2002

Non-photorealistic rendering can be used to illustrate subtle spatial relationships that might not be visible with more realistic rendering techniques. We present a parallel hardware-accelerated rendering technique, making extensive use of multi-texturing and paletted textures, for the interactive non-photorealistic visualization of scalar volume data. With this technique, we can render a 512x512x512 volume using non-photorealistic techniques that include tone-shading, silhouettes, gradient-base ...
